

KOPERNIK GLOBAL ALL-CAP FUND

JUNE 2021

FUND OBJECTIVE

The Kopernik Global All-Cap Fund (the "Fund") seeks to provide long-term capital appreciation.

FUND HIGHLIGHTS

- The Fund will invest primarily in equity securities of U.S. and non-U.S. companies.
- The Fund may invest in any country, market, and sector/industry across the market capitalization range within the Fund's predefined investment guidelines.
- Philosophy and process designed to capitalize on market dislocations based on fear and greed (i.e., identifying mispriced securities due to prevailing market sentiment).
- Intensive, original research leads to deep understanding of portfolio holdings.
- Risk is viewed on an absolute term and defined as permanent loss of capital/purchasing power.
- Opportunistic portfolio which we believe will have low correlation to other managers.

Using industry standard reporting, which utilizes harmonic average (a method of calculating that lessens the impact of large outliers) as of June 30, 2021, characteristics are as follows: P/E: 14.34 (GAC), 28.25 (MSCI ACWI) | P/B: 0.88 (GAC), 3.01 (MSCI ACWI) | P/CF: 4.56 (GAC), 15.28 (MSCI ACWI) | EV/S: 1.26 (GAC), 3.61 (MSCI ACWI).

The MSCI All Country World Index is a broad-based securities market index that captures over two thousand primarily large- and mid-cap companies across 23 developed and 27 emerging market countries. The MSCI All Country World Index is different from the strategy in a number of material respects, including being much more diversified among companies and countries, having less exposure to emerging market and small-cap companies, having no exposure to frontier markets and having no ability to invest in fixed income or derivative securities.

GLOSSARY

Active Share is a measure of the percentage of holdings in a portfolio that differ from the benchmark index. **Weighted Average Market Capitalization** is the portfolio-weighted mean average capitalizations of all equity securities. **Median Market Capitalization** is midpoint of market capitalization based on the equity market capitalization of all securities. **Trailing P/E** is the weighted average ratio of closing price to trailing 12-month market convention earnings per share as of the date of analysis. **Trailing P/CF** is the weighted average ratio of closing price to trailing 12-month cash flow per share as of the date of analysis. **Trailing P/B** is the weighted average ratio of closing price to book value per share as of the date of analysis. **Trailing EV/S** is the weighted average ratio of the enterprise value to trailing 12-month sales as of the date of analysis. **Small-Cap** = less than \$2 billion, **Mid-Cap** = \$2 billion - \$10 billion, **Large-Cap** = greater than \$10 billion.

IMPORTANT INFORMATION

The Fund may purchase or write options, which involve the payment or receipt of a premium by the investor and the corresponding right or obligation, as the case may be, to either purchase or sell the underlying instrument for a specific price at a certain time or during a certain period. Purchasing options involves the risk that the underlying instrument will not change price in the manner expected, so that the investor loses its premium. Put and call options on indices give the holder the right to receive, upon exercise of the option, an amount of cash if the closing level of the underlying index is greater than (or less than, in the case of puts) the exercise price of the option. This amount of cash is equal to the difference between the closing price of the index and the exercise price of the option, expressed in dollars multiplied by a specified number. Thus, unlike options on individual securities, all settlements are in cash, and gain or loss depends on price movements in the particular market represented by the index generally, rather than the price movements in individual securities.

To determine if this Fund is an appropriate investment for you, carefully consider the investment objectives, risks, charges and expenses of the Fund before investing. This and other information can be found in the summary and full prospectuses, which may be obtained by contacting your investment professional or calling Kopernik Funds at 1-855-887-4KGI (4544). Read them carefully before investing. Check with your investment professional to determine if the Fund is available for sale within their firm. Not all funds are available for sale at all firms.

Mutual fund investing involves risk, including possible loss of principal. There can be no assurance that the Fund will achieve its stated objectives. Equity funds are subject generally to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees, all of which are more fully described in the Fund's prospectus. Investments in foreign securities may underperform and may be more volatile than comparable U.S. securities because of the risks involving foreign economies and markets, foreign political systems, foreign regulatory standards, foreign currencies and taxes. Investments in foreign and emerging markets present additional risks, such as increased volatility and lower trading volume.
