

KOPERNIK INTERNATIONAL FUND

MARCH 2022

FUND OBJECTIVE

The Kopernik International Fund (the "Fund") seeks to provide long-term capital appreciation.

FUND HIGHLIGHTS

- The Fund will invest primarily in equity securities of companies in any country, market, and sector/industry, generally across the mid- to large- market capitalization range.
- The Fund may invest up to 15% of its net assets in U.S. domiciled businesses that have significant business activities outside the United States, as determined by the Adviser.
- Philosophy and process designed to capitalize on market dislocations based on fear and greed (i.e., identifying mispriced securities due to prevailing market sentiment).
- Intensive, original research leads to deep understanding of portfolio holdings.
- Risk is viewed on an absolute term and defined as permanent loss of capital/purchasing power.
- Opportunistic portfolio which we believe will have low correlation to other managers.

GROUP VETTING

*As of August 2, 2021, we are unable to add to this position, and will need to divest on or before June 3, 2022, under an existing executive order.

The U.S. government has imposed sanctions on Russian companies across multiple business sectors, which may inhibit Kopernik's ability to buy or sell certain securities. Kopernik continues to monitor the situation and will comply with all U.S. sanctions.

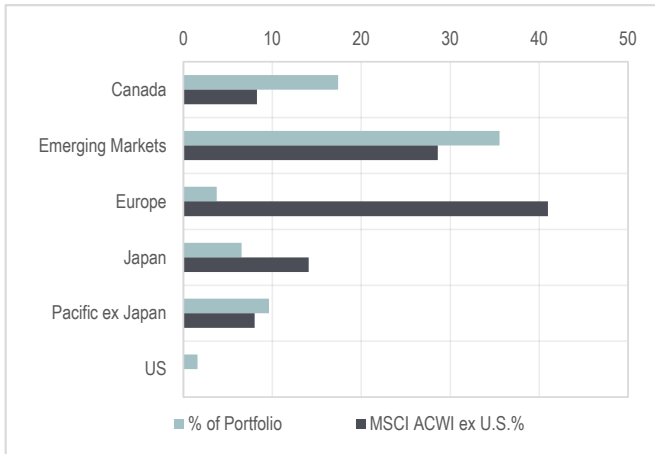

As a percentage of total net assets. These positions may change over time without notice. Country classification primarily based on MSCI classification (Bloomberg Country of Risk classification when MSCI is unavailable). The holdings listed should not be considered recommendations to purchase or sell a particular security. It should not be assumed that securities bought or sold in the future will be profitable or will equal the performance of the securities in this portfolio.

Mutual fund investing involves risk, including possible loss of principal. There can be no assurance that the Fund will achieve its stated objectives. Equity funds are subject generally to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees, all of which are more fully described in the Fund's prospectus. Investments in foreign securities may underperform and may be more volatile than comparable U.S. securities because of the risks involving foreign economies and markets, foreign political systems, foreign regulatory standards, foreign currencies and taxes. Investments in foreign and emerging markets present additional risks, such as increased volatility and lower trading volume.
