**Kopernik International Fund**

**Fund Objective**
The Kopernik International Fund (the “Fund”) seeks to provide long-term capital appreciation.

**Fund Highlights**
- The Fund will invest primarily in equity securities of companies in any country, market, and sector/industry, generally across the mid- to large- market capitalization range.
- The Fund may invest up to 15% of its net assets in U.S. domiciled businesses that have significant business activities outside the United States, as determined by the Adviser.
- Philosophy and process designed to capitalize on market dislocations based on fear and greed (i.e., identifying mispriced securities due to prevailing market sentiment).
- Intensive, original research leads to deep understanding of portfolio holdings.
- Risk is viewed on an absolute term and defined as permanent loss of capital/purchasing power.
- Opportunistic portfolio which we believe will have low correlation to other managers.

The MSCI All Country World Index ex U.S. is a broad-based securities market index that captures over two thousand primarily large- and mid-cap companies across 22 developed and 27 emerging market countries. The MSCI All Country World Index ex U.S. is different from the strategy in a number of material respects, including being much more diversified among companies and countries, having less exposure to emerging market and small-cap companies, having no exposure to frontier markets and having no ability to invest in fixed income or derivative securities.

**Glossary**

Active Share is a measure of the percentage of holdings in a portfolio that differ from the benchmark index. Weighted Average Market Capitalization is the portfolio-weighted mean average capitalizations of all equity securities. Median Market Capitalization is midpoint of market capitalization based on the equity market capitalization of all securities. Trailing P/E is the weighted average ratio of closing price to trailing 12 month market convention earnings per share as of the date of analysis. Trailing P/CF is the weighted average ratio of closing price to trailing 12 month cash flow per share as of the date of analysis. Trailing EV/S is the weighted average ratio of enterprise value to trailing 12 month sales as of the date of analysis. Small-Cap = less than $2 billion, Mid-Cap = $2 billion - $10 billion, Large-Cap = greater than $10 billion.

**Important Information**

To determine if this Fund is an appropriate investment for you, carefully consider the investment objectives, risks, charges and expenses of the Fund before investing. This and other information can be found in the summary and full prospectuses, which may be obtained by contacting your investment professional or calling Kopernik Funds at 1-855-887-4KGI (4544). Read them carefully before investing. Check with your investment professional to determine if the Fund is available for sale within their firm. Not all funds are available for sale at all firms.

Mutual fund investing involves risk, including possible loss of principal. There can be no assurance that the Fund will achieve its stated objectives. Equity funds are subject generally to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees, all of which are more fully described in the Fund’s prospectus. Investments in foreign securities may underperform and may be more volatile than comparable U.S. securities because of the risks involving foreign economies and markets, foreign political systems, foreign regulatory standards, foreign currencies and taxes. Investments in foreign and emerging markets present additional risks, such as increased volatility and lower trading volume.
