

KOPERNIK INTERNATIONAL

Second Quarter 2019

INVESTMENT APPROACH

Kopernik's investment philosophy is centered on the belief that market inefficiencies present numerous opportunities to identify quality businesses that we believe are mispriced. The Firm utilizes bottom-up fundamental analysis to gain a thorough understanding of a company's business and valuation.

Kopernik International is an international equity strategy that seeks capital appreciation by investing in businesses in mid to large cap equities across developed, emerging and frontier markets. The strategy seeks positions that trade at significant differentials to their risk-adjusted intrinsic values.

PORTFOLIO MANAGERS

Mark McKinney, CFA | Co-Portfolio Manager

Co-Portfolio Manager since inception. Mark is a principal at Kopernik, with over 27 years of industry experience. He also serves as an analyst covering the telecommunications, technology and media sectors.

Portfolio weights, regions and characteristics above are based on the holdings of a model portfolio as of June 30, 2019. Portfolio characteristics, sector and region designations are calculated using data from Bloomberg.

Kopernik International composite started July 1, 2015.

Valuations and returns are computed and stated in U.S. Dollars. Results reflect the reinvestment of dividends and other earnings. Composite returns are net of non-reclaimable withholding taxes. Gross of fee returns for the composite are presented after all trading expenses. Net of fee returns are presented net of estimated actual investment management fees, including performance fees, if any. Investor performance may be higher or lower.

The performance shown is compared to the MSCI All Country World ex USA Index, a broad-based securities market index that captures over two thousand primarily large and mid cap companies across 23 developed and 26 emerging market countries as of June 30, 2019. Broad-based securities indices are unmanaged and are not subject to fees and expenses typically associated with managed accounts or investment funds. The MSCI All Country World ex USA Index is different from the strategy in a number of material respects, including being much more diversified among companies and countries, having less exposure to emerging markets, and having no ability to invest in fixed income or derivative securities. **Past performance is no guarantee of future results.**

PORTFOLIO SECTOR WEIGHTS*

PORTFOLIO REGION WEIGHTS*

*Does not include options which as of June 30, 2019 was approximately 0.75% of the portfolio.

Portfolio weights, regions and characteristics above are based on the holdings of a model portfolio as of June 30, 2019. Portfolio characteristics, sector and region designations are calculated using data from Bloomberg. Harmonic weighted average is a method of calculating an average value that lessens the impact of large outliers. Weighted average is a method of calculating an average in which each value is assigned a weight. Active Share is a measure of the percentage of holdings in a portfolio that differ from the benchmark index.

IMPORTANT INFORMATION

The material herein is not an offer to sell or a solicitation of an offer to purchase securities of any kind.

This report may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve inherent risks and uncertainties, and we might not be able to achieve the predictions, forecasts, projections and other outcomes we may describe or imply. A number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions we express in these forward-looking statements. We do not intend to update these forward-looking statements except as may be required by applicable laws. Forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond our control and are difficult to predict. As a result, actual results could differ materially from those expressed, implied or forecasted in the forward-looking statements.

Please consider all risks carefully before investing. An investment in the Kopernik International Fund, or any other vehicle using the same strategy, is subject to many risks including sudden changes in general market valuations and market liquidity. Investments in small and mid-capitalization companies also tend to involve greater risk and portfolio price volatility than investments in larger capitalization stocks. Further, investing in non-U.S. markets, including emerging and frontier markets, involves certain additional risks, including potential currency fluctuations and capital controls, restrictions on foreign investments, less governmental supervision and regulation, less liquidity, less disclosure, and the potential for higher market volatility, share expropriation, confiscatory taxation, and social, economic and political instability. Further, investments in energy and other natural resources companies tend to be greatly impacted by developments in global commodities markets, which can be more volatile than equity markets.
