

## KOPERNIK GLOBAL ALL-CAP

Fourth Quarter 2021

### Strategy Information

Kopernik's investment philosophy is centered on the belief that market inefficiencies present numerous opportunities to identify quality businesses that we believe are mispriced. The Firm utilizes bottom-up fundamental analysis to gain a thorough understanding of a company's business and valuation. The Global All-Cap strategy primarily invests in equity shares, and may also invest in equity-related derivatives including depositary shares, preferred shares, warrants, rights, and options, and may invest in fixed income securities (generally limited to 10% of assets).

### Strategy Information

Inception: July 1, 2013

\*Annualized, \*\*Preliminary

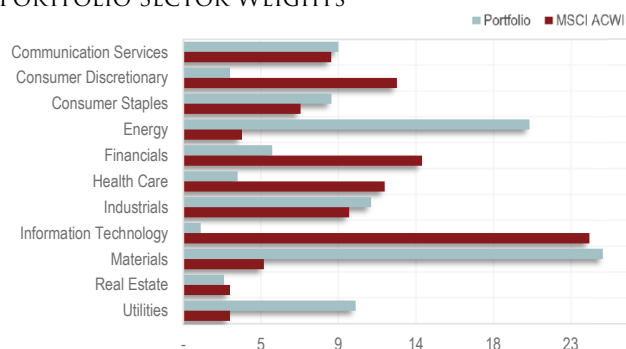

2013 period is strategy inception July 1, 2013 through December 31, 2013.

Valuations and returns are computed and stated in U.S. Dollars. Results reflect the reinvestment of dividends and other earnings. Composite returns are net of non-reclaimable withholding taxes. Gross of fee returns for the composite are presented after all trading expenses. Net of fee returns are presented net of estimated actual investment management fees, including performance fees, if any. Investor performance may be higher or lower.

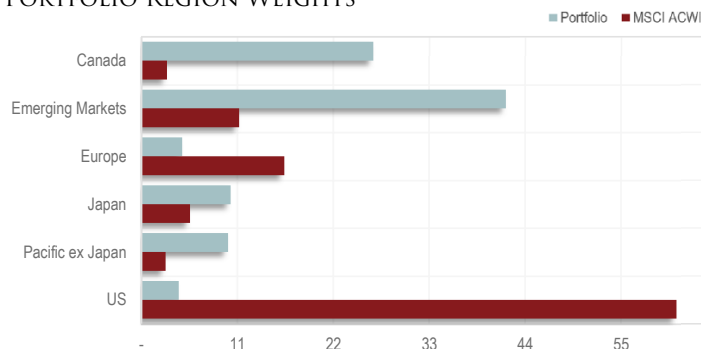

Past performance is no guarantee of future results.

Enterprise Value to Sales	1.20	3.43
Price to Sales	0.71	2.25
Dividend Yield	3.72	2.12

Characteristics above are as of December 31, 2021 and are calculated using data from Bloomberg. Calculation method is a weighted average using GAAP/IFRS financials and including companies with negative metrics. Using industry standard reporting, which utilizes harmonic average (a method of calculating that lessens the impact of large outliers) as of December 31, 2021, characteristics are as follows: P/E: 9.94 (GAC), 21.73 (MSCI ACWI) | P/B: 0.71 (GAC), 3.04 (MSCI ACWI) | P/CF: 4.38 (GAC), 14.40 (MSCI ACWI) | EV/S: 1.12 (GAC), 3.43 (MSCI ACWI).

## IMPORTANT INFORMATION

The material herein is not an offer to sell or a solicitation of an offer to purchase securities of any kind.

This report may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve inherent risks and uncertainties, and we might not be able to achieve the predictions, forecasts, projections and other outcomes we may describe or imply. A number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions we express in these forward-looking statements. We do not intend to update these forward-looking statements except as may be required by applicable laws. Forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond our control and are difficult to predict. As a result, actual results could differ materially from those expressed, implied or forecasted in the forward-looking statements.

The MSCI All Country World Index is a broad-based securities market index that captures over two thousand primarily large- and mid-cap companies across 23 developed and 27 emerging market countries. The MSCI All Country World Index is different from the strategy in a number of material respects, including being much more diversified among companies and countries, having less exposure to emerging market and small- cap companies, having no exposure to frontier markets and having no ability to invest in fixed income or derivative securities.

The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of MSCI Inc. ("MSCI") and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. ("S&P") and is licensed for use by Kopernik Global Investors, LLC. Neither MSCI, S&P nor any third party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability and fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. Please consider all risks carefully before investing. An investment in the Kopernik Global All-Cap Master Fund, or any other vehicle using the same strategy, is subject to many risks including sudden changes in general market valuations and market liquidity. Investments in small and mid-capitalization companies also tend to involve greater risk and portfolio price volatility than investments in larger capitalization stocks. Further, investing in non-U.S. markets, including emerging and frontier markets, involves certain additional risks, including potential currency fluctuations and capital controls, restrictions on foreign investments, less governmental supervision and regulation, less liquidity, less disclosure, and the potential for higher market volatility, share expropriation, confiscatory taxation, and social, economic and political instability. Further, investments in energy and other natural resources companies tend to be greatly impacted by developments in global commodities markets, which can be more volatile than equity markets.
