

KOPERNIK INTERNATIONAL FUND

MARCH 2018

FUND OBJECTIVE

The Kopernik International Fund (the "Fund") seeks to provide long-term capital appreciation

FUND HIGHLIGHTS

- The Fund will invest primarily in equity securities of companies in any country, market, and sector/industry, generally across the mid- to large- market capitalization range
- The Fund may invest up to 15% of its net assets in U.S. domiciled businesses that have significant business activities outside the United States, as determined by the Adviser
- Philosophy and process designed to capitalize on market dislocations based on fear and greed (i.e., identifying mispriced securities due to prevailing market sentiment)
- Intensive, original research leads to deep understanding of portfolio holdings
- Risk is viewed on an absolute term and defined as permanent loss of capital/purchasing power
- Opportunistic portfolio which we believe will have low correlation to other managers
