Before you invest, you may want to review the Fund's complete prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <http://kopernikglobal.com/content/mutual-fund-kopernik-international-fund>. You can also get this information at no cost by calling 1-855-887-4KGI (4544), by sending an e-mail request to funds@kopernikglobal.com, or by asking any financial intermediary that offers shares of the Fund. The Fund's prospectus and statement of additional information, both dated March 1, 2024, as they may be amended from time to time, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website, phone number or e-mail address noted above.

Investment Objective

The Kopernik International Fund (the “Fund” or the “International Fund”) seeks long-term growth of capital.

Fund Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold Investor Class Shares or Class I Shares of the Fund. You may be required to pay commissions and/or other forms of compensation to a broker for transactions in Class I Shares, which are not reflected in the table or the example below.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Investor Class Shares	Class I Shares
Management Fees	0.90%	0.90%
Distribution and Service (12b-1) Fees	0.25%	None
Other Expenses	0.14%	0.14%
Total Annual Fund Operating Expenses ¹	1.29%	1.04%

¹ Kopernik Global Investors, LLC (the “Adviser”) has contractually agreed to reduce its fees and/or reimburse expenses in order to keep Total Annual Fund Operating Expenses (excluding interest, taxes, brokerage commissions and other costs and expenses relating to the securities that are purchased and sold by the Fund, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles, and non-routine expenses (collectively, “Excluded Expenses”)) from exceeding 1.35% of the Fund’s Investor Class Shares’ average daily net assets and 1.10% of the Fund’s Class I Shares’ average daily net assets until February 28, 2025 (the “Contractual Expense Limit”). In addition, the Adviser may receive from the Fund the difference between the Total Annual Fund Operating Expenses (not including Excluded Expenses) and the Contractual Expense Limit to recoup all or a portion of its prior fee waivers or expense reimbursements made during the rolling three-year period preceding the date of the recoupment if at any point Total Annual Fund Operating Expenses (not including Excluded Expenses) are below the Contractual Expense Limit (i) at the time of the fee waiver and/or expense reimbursement and (ii) at the time of the recoupment. This agreement may be terminated: (i) by the Board of Trustees (the “Board”) of The Advisors’ Inner Circle Fund II (the “Trust”), for any reason at any time, or (ii) by the Adviser, upon ninety (90) days’ prior written notice to the Trust, effective as of the close of business on February 28, 2025.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has

a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor Class Shares	\$131	\$409	\$708	\$1,556
Class I Shares	\$106	\$331	\$574	\$1,271

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the example, affect the Fund’s performance. During its most recent fiscal year, the Fund’s portfolio turnover rate was 53% of the average value of its portfolio.

Principal Investment Strategies

The Fund, under normal market conditions, will invest primarily in equity securities of companies located throughout the world. The equity securities in which the Fund plans to invest include common and preferred stock, convertible securities, depositary receipts, and private placements. The Fund generally follows a multi-capitalization approach that focuses on mid- to large-capitalization companies, but the Fund may also invest in small capitalization companies. The Fund may invest significantly in securities of issuers located in emerging or frontier markets, which the Adviser defines as countries other than those classified as developed by MSCI. No more than 35% of the Fund’s net assets may be invested in securities of companies located in a single country. As a result of the Adviser’s investment strategy, a large portion of the portfolio may be invested in a particular country or region. The Fund may invest up to 15% of its net assets in U.S. domiciled businesses that have significant business activities outside the United States, as determined by the Adviser.

In pursuing the Fund’s investment objective, the Adviser seeks to achieve its investment objective through an active, research-driven, fundamentals-based, value-oriented investment process. The Adviser adheres to disciplined, value-driven investment strategies that

emphasize securities chosen through in-depth research and follows those securities over time to assess whether they continue to meet the purchase rationale.

The Adviser selects equity securities through bottom-up fundamental research. The Adviser's research analysts continually evaluate companies within their defined investable universe based upon a variety of both qualitative and quantitative criteria. Quantitative measures include price-to-earnings, price-to-book value, price-to-sales, price-to-net present value, price-to-free cash flow, sustainable dividend yield and price-to-liquidation/replacement value. The qualitative analysis assists the research team in producing an understanding of franchise quality, management strength, corporate strategy, barriers-to-entry, shareholder value orientation, operating and industry fundamentals and competitive advantage. The research-driven investment process seeks to add value through active management and by selecting securities of companies that, in the Adviser's opinion, are misperceived and undervalued by the market. The Adviser makes use of convertible securities on an opportunistic basis as an alternative to the underlying equity in addition to also considering securities across a company's capital structure, including debt.

The Adviser may sell a security when the Adviser believes that it has found a better alternative, the security's fundamentals have deteriorated, or the security's value has appreciated and approached the Adviser's estimated intrinsic value. When the Adviser believes that market conditions are unfavorable to its style of investing, or is otherwise unable to locate attractive investment opportunities, the Fund may hold a higher level of cash or money market instruments. Due to a larger percentage of such holdings, the Fund may not participate in market advances or declines to the same extent that it would if the Fund remained more fully invested in equity securities.

Principal Risks

As with all mutual funds, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and it is not insured or guaranteed by the FDIC or any government agency.** The principal risk factors affecting shareholders' investments in the Fund are set forth below.

Equity Risk — Since it purchases equity securities, the Fund is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of

the Fund's equity securities may fluctuate drastically from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund. These factors contribute to price volatility, which is the principal risk of investing in the Fund.

Foreign/Emerging and Frontier Market Security Risk — Non-U.S. securities may be subject to additional risks due to, among other things, political, social and economic developments abroad, currency movements and different legal, regulatory and tax environments. Non-U.S. securities are also subject to risks associated with the potential imposition of economic and other sanctions against a particular foreign country, its nationals or industries or businesses within the country. In addition, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may require the Fund to sell such investments at inopportune times, which could result in losses to the Fund. These additional risks may be heightened with respect to emerging and frontier market countries since political turmoil and rapid changes in economic conditions are more likely to occur in these countries.

Geographic Focus Risk — To the extent that a large portion of its portfolio is invested in a particular country or region, the Fund may be more susceptible to economic, political, regulatory or other events or conditions affecting issuers within that country or region. As a result, the Fund may be subject to greater price volatility and risk of loss than a fund holding more geographically diverse investments.

Sector Focus Risk — Because the Fund may, from time to time, be more heavily invested in particular sectors, the value of its shares may be especially sensitive to factors and economic risks that specifically affect those sectors. As a result, the Fund's share price may fluctuate more widely than the value of shares of a mutual fund that invests in a broader range of sectors.

Small and Medium Capitalization Companies Risk — The risk that small and medium capitalization companies in which the Fund invests may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, small and medium capitalization companies may have limited product lines, markets and financial resources, and may depend upon a relatively small management group. Therefore, small capitalization and medium capitalization stocks may be more volatile than those of larger companies. Small capitalization and medium capitalization stocks may be traded over-the-counter or listed on an exchange. The market for small and medium capitalization companies may be less liquid than the market for larger capitalization companies.

Foreign Currency Risk — As a result of the Fund's investments in securities denominated in, and/or receiving revenues in, foreign currencies, the Fund will be subject to foreign currency risk. Foreign currency risk is the risk that foreign currencies will decline in value relative to the U.S. dollar, in which case, the dollar value of an investment in the Fund would be adversely affected.

Sanctions Risk — On February 24, 2022, Russia launched a large-scale invasion of Ukraine, significantly amplifying already existing geopolitical tensions. Russia's actions and the resulting responses by the United States and other countries could increase volatility and uncertainty in the financial markets and adversely affect regional and global economies. The United States and other countries have imposed broad-ranging economic sanctions on Russia, certain Russian individuals, banking entities and corporations, and Belarus as a response to Russia's invasion of Ukraine and may impose sanctions on other countries. The extent and duration of the war in Ukraine and the longevity and severity of sanctions remain unknown, but they could have a significant adverse impact on the European economy as well as the price and availability of certain commodities, including oil and natural gas, throughout the world. These sanctions, and the resulting disruption of the Russian economy, may cause volatility in other regional and global markets and may negatively impact the performance of various sectors and industries, as well as companies in other countries, which could have a negative effect on the performance of the Fund. The sanctions and/or any retaliatory action by Russia could also require the Fund to freeze any existing investments in Russian companies or prohibit the Fund from selling or transacting in these investments and could potentially impact the Fund's liquidity. In general terms, the overall negative impact to the Fund will depend on the extent to which the Fund is prohibited from selling or otherwise

transacting in its investments at any given time and whether a fair market valuation can be readily obtained, particularly for any Russia currency-denominated investments and investments in U.S. dollar-denominated depositary receipts representing securities of Russian issuers.

Depository Receipts Risk — Depository receipts are certificates evidencing ownership of shares of a foreign issuer that are issued by depository banks and generally trade on an established market. Depository receipts are subject to many of the risks associated with investing directly in foreign securities, including, among other things, political, social and economic developments abroad, currency movements, and different legal, regulatory and tax environments.

Convertible and Preferred Securities Risk — Convertible and preferred securities have many of the same characteristics as stocks, including many of the same risks. In addition, convertible securities may be more sensitive to changes in interest rates than stocks. Convertible securities may also have credit ratings below investment grade, meaning that they carry a higher risk of failure by the issuer to pay principal and/or interest when due.

Liquidity Risk — Certain securities, including privately placed securities and securities of emerging or frontier market issuers, may be difficult or impossible to sell at the time and the price that the Fund would like. The Fund may have to accept a lower price to sell a security, sell other securities to raise cash, or give up an investment opportunity, any of which could have a negative effect on Fund management or performance.

Private Placements Risk — Investment in privately placed securities may be less liquid than in publicly traded securities. Although these securities may be resold in privately negotiated transactions, the prices realized from these sales could be less than those originally paid by the Fund or less than what may be considered the fair value of such securities. Further, companies whose securities are not publicly traded may not be subject to the disclosure and other investor protection requirements that might be applicable if their securities were publicly traded.

Performance Information

The bar chart and the performance table below illustrate the risks and volatility of an investment in the Fund by showing changes in the Fund's Class I Shares' performance from year to year and by showing

how the Fund’s Class I Shares’ and Investor Class Shares’ average annual total returns for 1 and 5 years and since inception compare with those of a broad measure of market performance. Of course, the Fund’s past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future.

Updated performance information is available by calling 855-887-4KGI or by visiting the Fund’s website at www.kopernikglobal.com.

Average Annual Total Returns for Periods Ended December 31, 2023

This table compares the Fund’s average annual total returns for the periods ended December 31, 2023 to those of an appropriate broad based index.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns will depend on an investor’s tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts (“IRAs”). After-tax returns are shown for Class I Shares only. After-tax returns for Investor Class Shares will vary.

Kopernik International Fund	1 Year	5 Years	Since Inception¹
Fund Returns Before Taxes			
Class I Shares	13.82%	9.56%	7.42%
Investor Class Shares	13.52%	9.28%	9.02%
Fund Returns After Taxes on Distributions			
Class I Shares	9.85%	7.99%	6.39%
Fund Returns After Taxes on Distributions and Sale of Fund Shares			
Class I Shares	9.50%	7.24%	5.74%
MSCI All Country World Index ex-US (Net) (reflects no deduction for fees, expenses or taxes (except foreign withholding taxes))	15.62%	7.08%	4.51%

¹ Class I Shares of the Fund were offered beginning June 30, 2015. Investor Class Shares of the Fund were offered beginning December 10, 2018. Index comparison begins June 30, 2015.

Investment Adviser

Kopernik Global Investors, LLC

If you own your shares directly, you may redeem your shares on any day that the New York Stock Exchange (the “NYSE”) is open for business (a “Business Day”) by contacting the Fund directly by mail at: Kopernik Funds, P.O. Box 219009, Kansas City, MO 64121-9009 (Express Mail Address: Kopernik Funds, c/o SS&C Global Investor & Distribution Solutions, Inc., 430 West 7th Street, Kansas City, MO 64105) or telephone at: 855-887-4KGI.

If you own your shares through an account with a broker or other institution, contact that broker or institution to redeem your shares. Your broker or institution may charge a fee for its services in addition to the fees charged by the Fund.

Tax Information

The distributions made by the Fund generally are taxable, and will be taxed as qualified dividend income, ordinary income or capital gains. If you are investing through a tax-deferred arrangement, such as a 401(k) plan or IRA, you will generally not be subject to federal income

taxation on Fund distributions until you begin receiving distributions from your tax-deferred arrangement. You should consult your tax advisor regarding the rules governing your tax-deferred arrangement.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's web site for more information.
